

Figure 1. The following drawing is intended to provide an example of how the BFDS Robotic Scanner 'Samson' and 'Gideon' may look. It is not intended to be used to inhibit the invention.

Figure 2. The following drawing is intended to provide an example of how the BFDS Robotic Scanner 'Samson' and 'Gideon' may look. It is not intended to be used to inhibit the invention.

Figure 3. The following drawing is intended to provide an example of how the BFDS Robotic Scanner 'Gideon' may look using the projecting plates feature. It is not intended to be used to inhibit the

Figure 4. The following drawing is intended to provide an example of how the BFDS Robotic Scanner 'Gideon' and 'Samson' may look in its scan mode. It is not intended to be used to inhibit the invention.

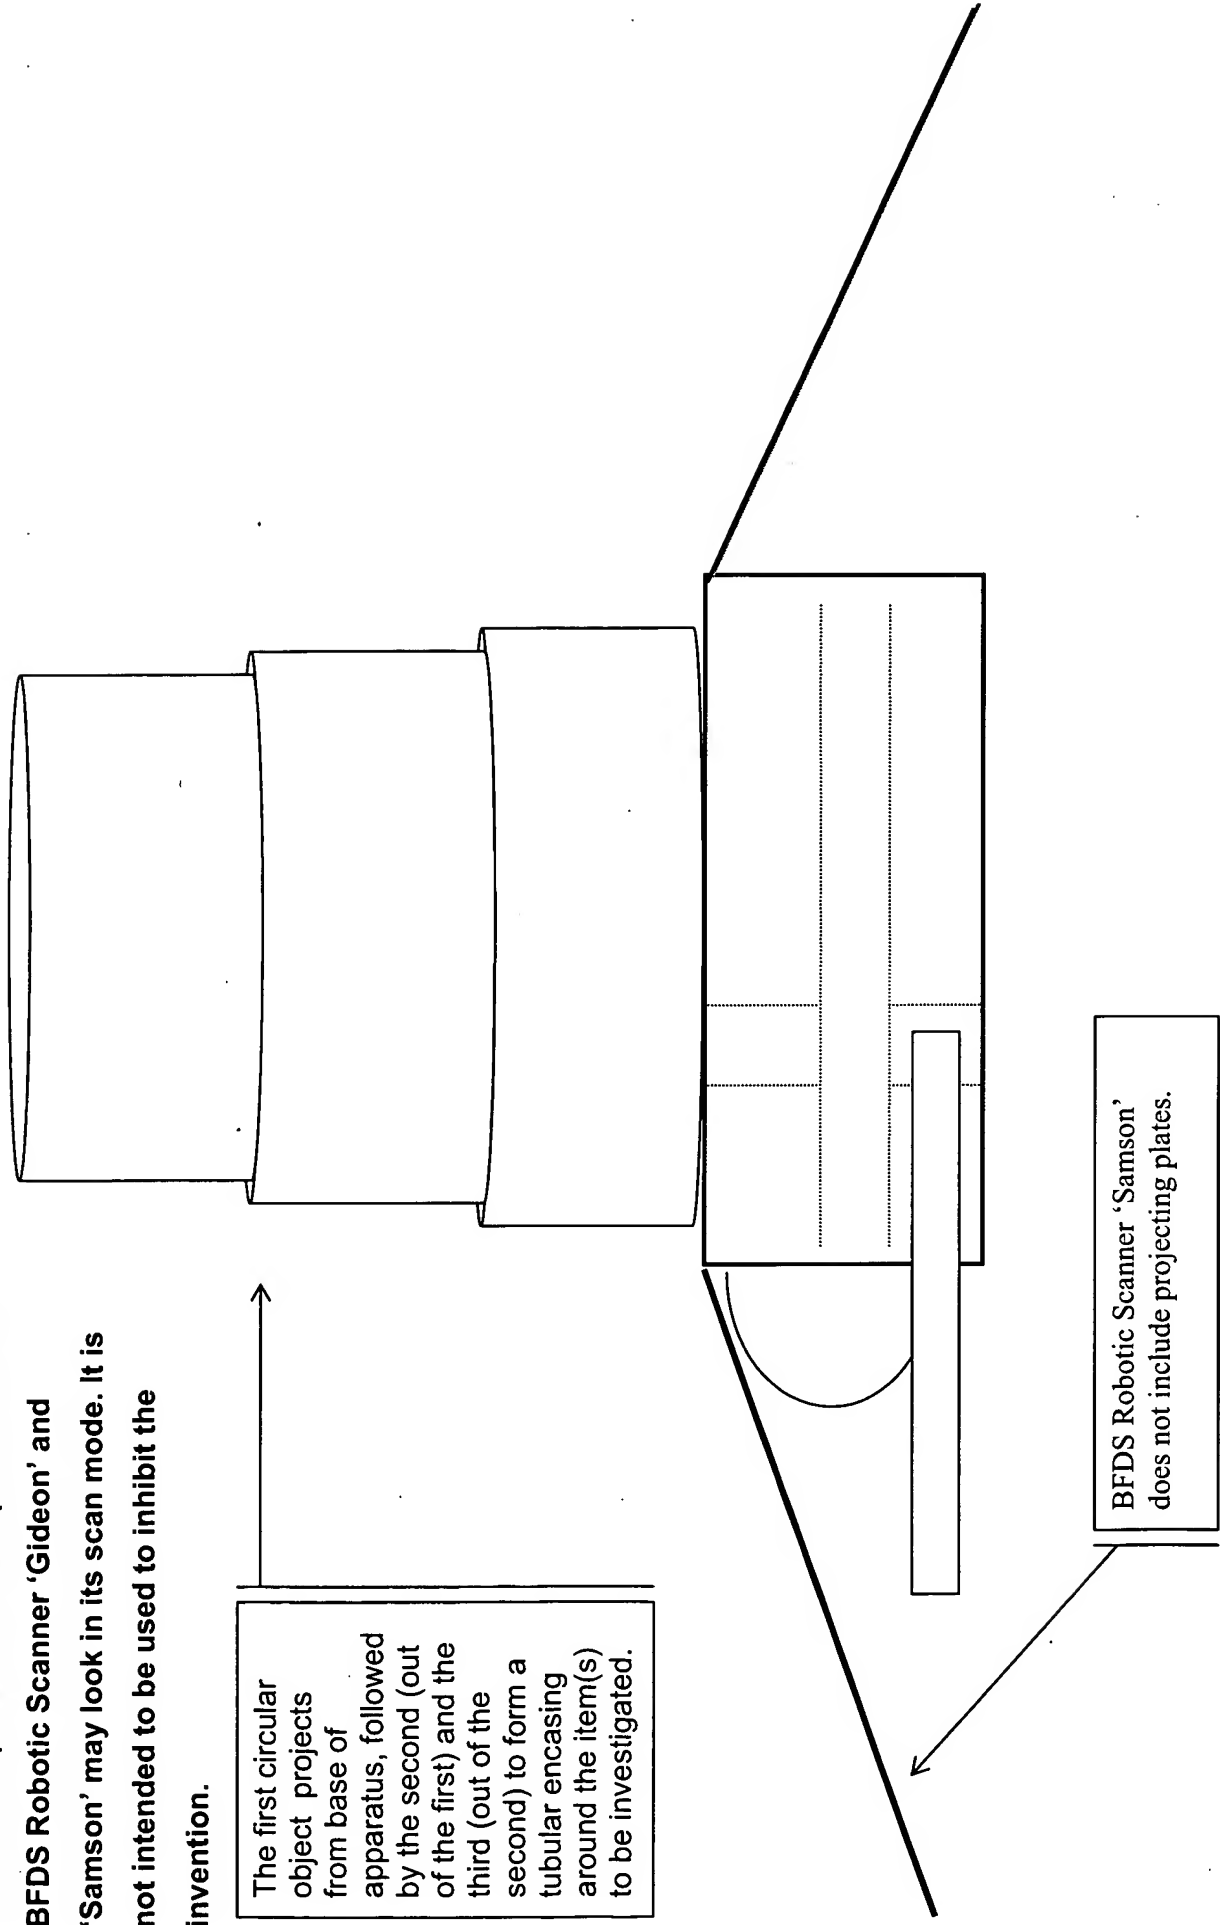

Figure 6. The following drawing is intended to provide an example of how the BFDS Handheld device may look. It is not intended to be used to inhibit the invention.

Hand Held Device – Front View

Figure 7. The following drawing is intended to provide an example of how the BFDS Robotic Scanner 'Jericho' may look. It is not intended to be used to inhibit the invention.

Figure 5. The following drawing (diagram) is intended to provide an example of the relationship between the BFDS RS CAT-XRF methodology and the cylinder objects that houses it. It is not intended to be used to inhibit the invention.

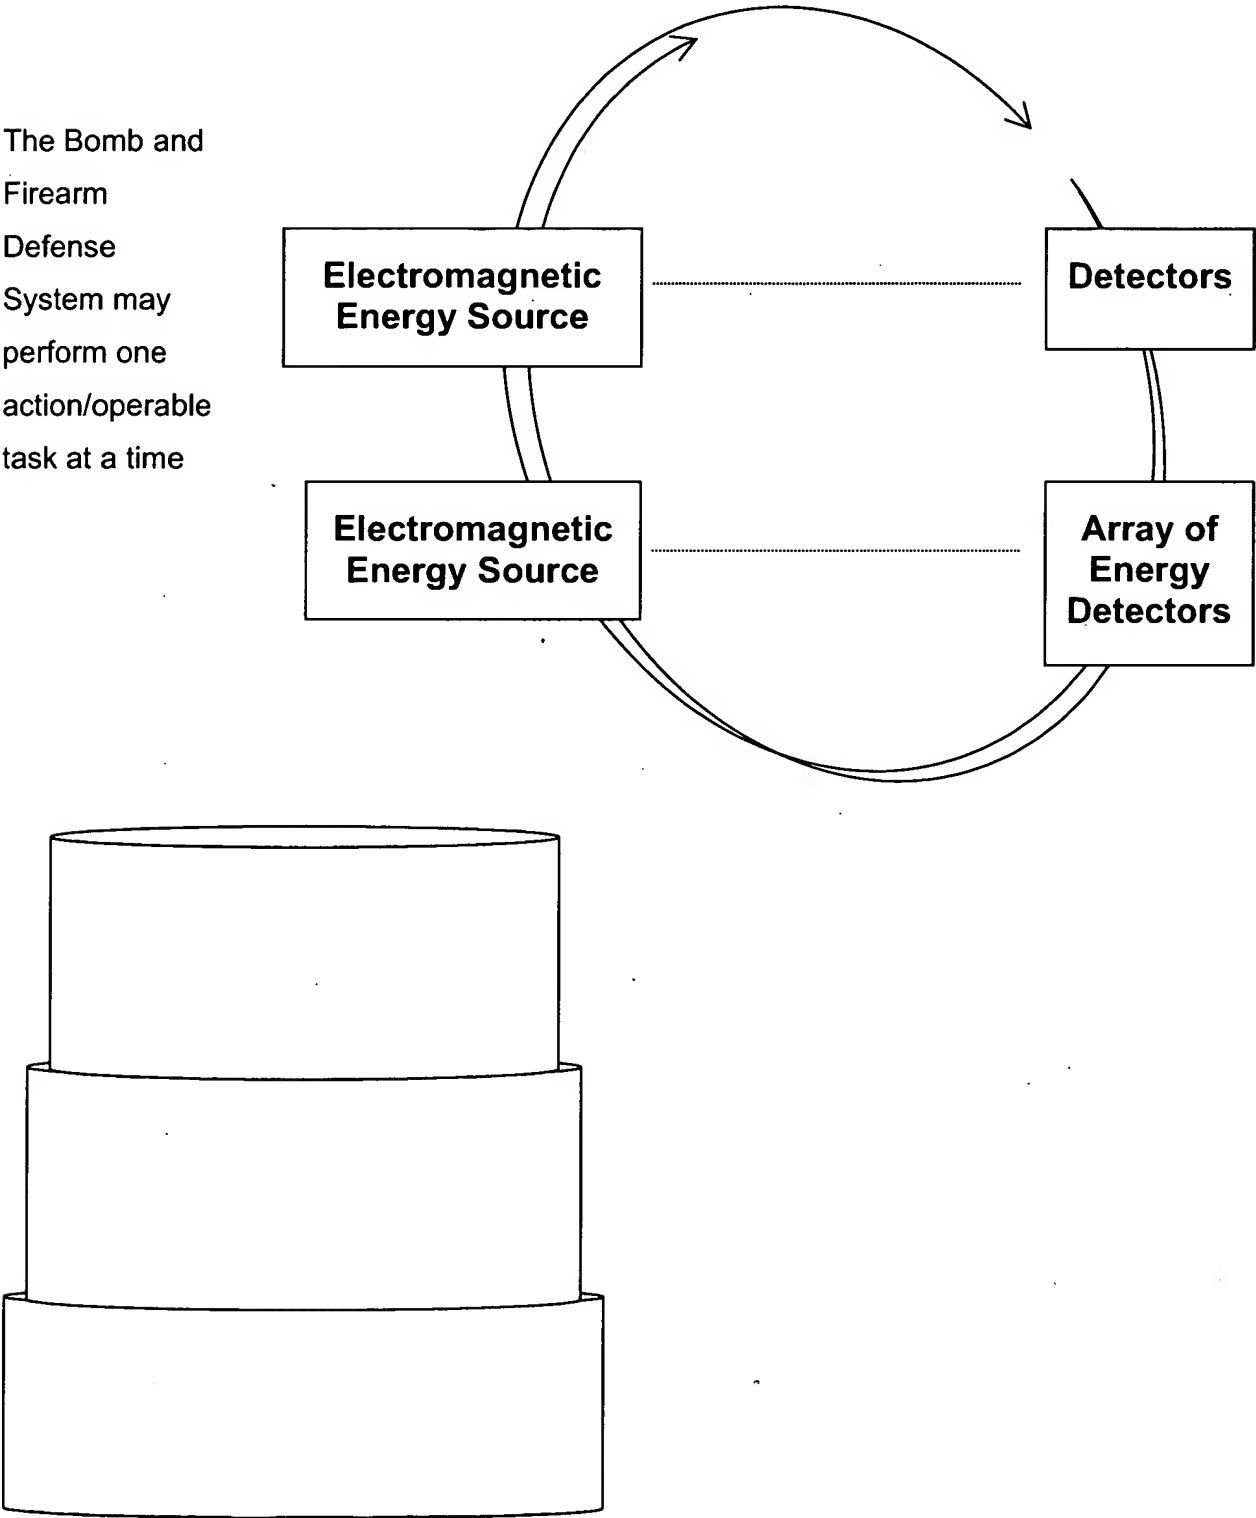

Figure 10. The following drawing is intended to provide an example of how the floor plan of the BFDS Transport System may look. It is not intended to be used to inhibit the invention.

Floor Plan for Transport System

Figure 8. The following drawing is intended to provide an example of how the BFDS Spider Cam may look. It is not intended to be used to inhibit the invention.

Figure 9. The following drawing is intended to provide an example of how the BFDS Surveillance Station may look. It is not intended to be used to inhibit the invention.
